- Map your automation opportunities
- Design & build your AI agents
- Leave with a deployment roadmap

# HOW WE WORK

Each phase builds on the last, so you're learning and doing simultaneously

## DEFINITION

## What is an Agentic AI Workshop?

A facilitated, full-day session where enterprise teams learn how AI agents work, map their highest-value automation opportunities, and build early versions of custom AI agents tailored to their specific business processes, no coding required. Unlike generic AI training, everything is built around your actual workflows, pain points, and integration environment.

## WHY THIS WORKSHOP?

### Beyond theory, into practice

You won't just hear about AI, you'll actively build agents.

### Your business, your agents

Focused on your specific processes, pain points, and challenges.

### From idea to action plan

Full cycle: understand, identify, build, plan for deployment.

### The Scotty AI approach

Straightforward, clear, and focused on real-world results.

## THE FIVE PHASES

## Together, we build your first digital worker

01

### EDUCATION

What agentic AI really means & real-world use cases

KICK-OFF

02

### DESIGNING

Mapping your biggest gain creators and pain relievers

KICK-OFF

03

### AGENT CREATION

Give your agent instructions, tools and a brain via prompt engineering

DESIGN & BUILD

04

### BUSINESS CASE

Quantify your investment vs. the expected returns

DESIGN & BUILD

05

### SOLUTION BLUEPRINT 0.1.

Plan how to deploy your digital workers in production

WRAP-UP

# YOUR DAY, MAPPED OUT

08:30 – 17:30 · Three phases · One day · Real outputs

## KICK-OFF & EXPLORATION

08:30–09:00

Arrival & coffee

09:00–09:30

Welcome & agenda

09:30–10:00

Meet Scotty AI

10:00–11:00

Automation brainstorm

11:00–12:00

Prioritise: effort vs. impact

## DESIGN & BUILD

13:00–13:30

Pick top use cases

13:30–14:30

Solution design & prompt engineering

14:30–15:30

Build the business case

15:30–16:30

Delivery & solution plan

## WRAP-UP & BUY-IN

16:30–17:00

Present your AI agents

17:00–17:30

Wrap-up & next steps

WHAT YOU LEAVE WITH

## Real outputs. Same day.

### Alpha AI Agents

What agentic AI really means & real-world use cases

### Automation Roadmap

Prioritised by effort vs. impact, stakeholders aligned

### ROI & Business Case

Quantified returns, ready to present to leadership

### Solution Blueprint

Timeline, recommendations & step-by-step launch checklist

### Internal Alignment

Key stakeholders identified and next steps agreed

### Prompt Engineering Skills

Your team can configure & iterate on agents independently

*"Scotty's workshop made AI real. Our team created three working AI agents in a single day."*

Phil Bailey, Head of Resourcing Innovation, Sopra Steria

# WHAT TEAMS SAY

Enterprise teams across HR, Customer Service, Operations and more.

Scotty's workshop made AI real. Our team created three working AI agents in a single day, tackling actual process bottlenecks. The hands-on format helped everyone grasp the core concepts and immediately apply them. We left energized, aligned, and ready to scale automation.

**Phil Bailey**  
Head of Resourcing Innovation · Sopra Steria

What a fantastic and well-prepared workshop! It was inspiring to see how quickly theory turned into practice, within just a few hours, we built our own AI agents tailored to real recruiting cases. Super engaging and hands-on.

**Sebastian Mosch**  
HR Director · SARIA Germany

Absolutely, it met my expectations. The input at the beginning was really helpful. They are inspired, and something happened in their heads. And if we did that, then all expectations are met.

**Claus Eckmann**  
Global Director Human Resources · SARIA

We had tons of fun! Thanks for showing what Scotty can do and helping us make better decisions going forward. Looking forward to putting what we learned into action.

**Richard Westerhof**  
System Engineer · Cloud86

## WHO SHOULD ATTEND

# The right minds at the table

6–12 participants. Limited space per session.

- Spot real pain points in workflows
- Influence how tech gets adopted
- Think critically about ROI
- Build & future-proof their department
- Decision-makers who can approve next steps

## WORKSHOP VS GENERIC AI TRAINING
